China's economic strategy: when theory meets practice

growth has become a central dilemma of China's economy (Shanghai Securities News 2017). If China did not work on deleveraging, there might be a financial crisis sooner or later; but if deleveraging was conducted too forcefully and quickly, many private enterprises might collapse, and consequently, China's economic and social development might

China and the Global Financial Crisis: Implications for ...

China's economy is heavily dependent on global trade and investment flows. In 2007, China overtook the United States to become the world's second largest merchandise exporter after the European Union (EU). China's net exports (exports minus imports) contributed to one-third of its GDP growth in 2007.

CHINA'S GILDED AGE

China has achieved "the fastest sustained expansion by a major economy in history," according to the World Bank. Why has China's economy grown so fast for so long despite vast corruption? This book shows that, in fact, China is not as exceptional as we think it is - the closest parallel is the United States in the late nineteenth century.

'China's Unsustainable Economic Growth and Development

Most of the literature analyzing the sustainability of China's economy tends to be directed at whether the country can maintain its unprecedented high rates of economic growth. Too little concern has been given to the sustainability of China's ecosystem, and the effect of rising consumption on the rapid degradation of that ecosystem.
